Features

Device Security

Norton Device Security brings real-time protection for your PCs, Mac[®], smartphones or tablets against ransomware, viruses, spyware, malware and other online threats, monitors and helps block unauthorised traffic, and helps protect your private and financial information when you go online.

Password Manager

Easily create, store, and manage your passwords, credit card information and other credentials online – more securely.

Smart Firewall for PC or Firewall for Mac[®]

Helps protect your device and data against malicious attacks and intrusive eyes by monitoring and blocking suspicious network traffic.

PC Cloud Backup

Automatic¹ Cloud Backup for PCs – to store important files and documents as a preventative measure against hard drive failures, stolen devices and even ransomware.

System Requirements

Device Security

Not all features are available on all devices and platforms.
Norton Cloud Backup is presently not supported on Mac OS.
